

## 12" SERIES RETRACTABLE DATA REEL

### PRODUCT DESCRIPTION

Introducing our new cutting-edge 12-inch retractable data reel, meticulously crafted from premium 304 stainless steel and anodized aluminum for unparalleled durability and strength. Engineered for seamless functionality, this product boasts controlled retraction of the cable, ensuring safe and effortless cable management. Our reel offers versatile installation options to suit a variety of workspaces. It is outfitted with a mounting bracket featuring various common mounting patterns and an adjustable cable guide arm.

The user-friendly pawl and ratchet system facilitates convenient locking and unlocking of the cable. Thus, allowing one handed manipulation while enhancing ease of use and efficiency. With a capacity to hold cable lengths ranging from 50 to 100 plus feet, (depending on cable type) our retractable reel adapts to diverse requirements with ease. Plus, our commitment to customization shines through with available OEM solutions tailored to specific needs, ensuring optimal performance and satisfaction.

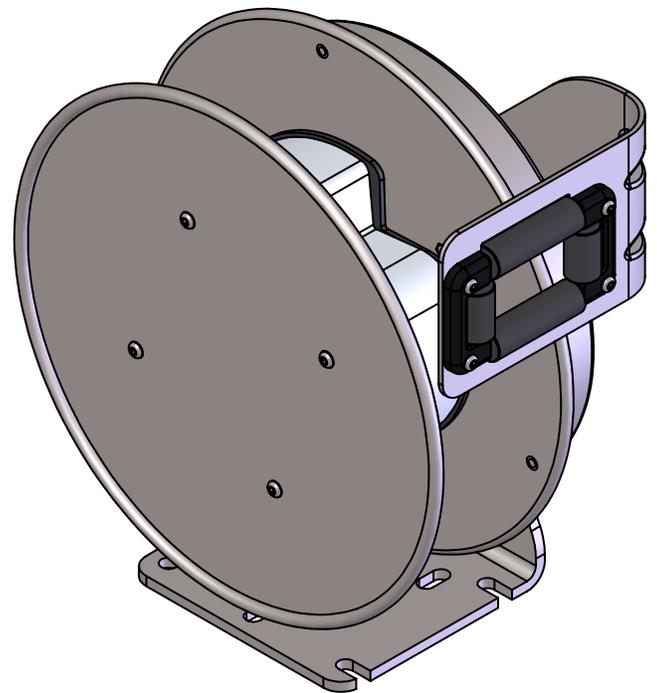

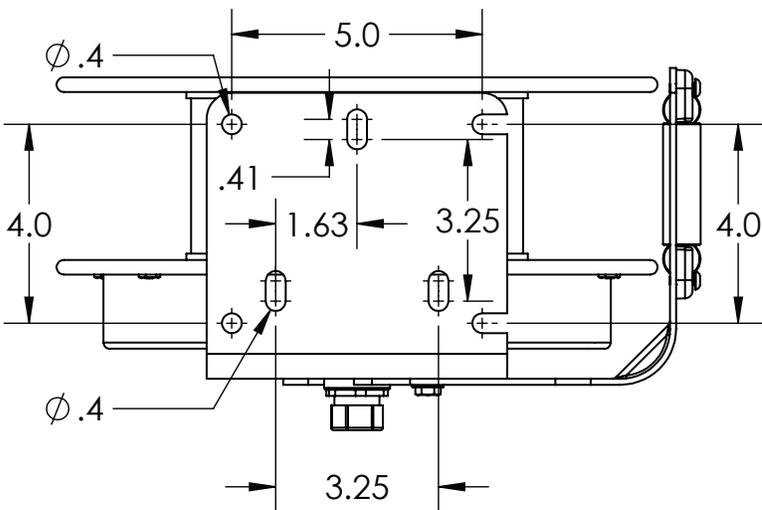

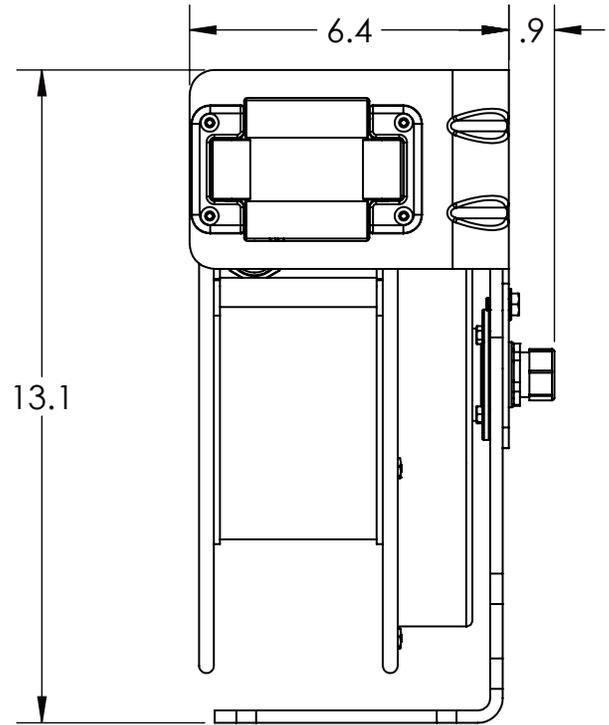

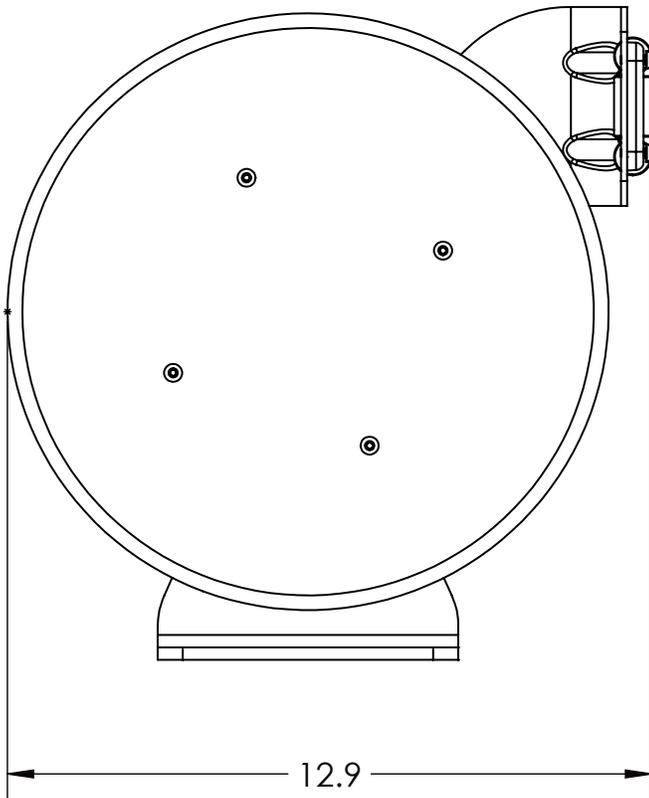

### APPLICATIONS
